Q.1. Read the passage carefully and answer the questions that follow.

1. Laughter is a way of showing happiness. We laugh only when we are really happy. Everyone of us loves to laugh. That's why funny films or comedies are so popular. Is there any one whom jokes or tit-bits do not tickle to laugh? Hardly any.

2. Laughter refreshes and relaxes us. It lightens our minds by removing stress and strain. It lessens our worry. In this way it proves to be a very good tonic for the mind. When our mind is free from all sorts of worry and tension, we enjoy good mental health. And good mental health contributes a lot to our good physical health. That is why laughter is known as 'the best medicine'.

3. One of the well-known advantages of laughter is that it helps forget our sorrow and anger. Suppose, we are in an angry mood, somebody tries to lighten the atmosphere by cracking a joke. Now the humour and lighter content of the joke is bound to have its effect on us. As a result, we will stop sulking and find ourselves laughing. After a good laugh, nobody can continue to be angry. Laughter melts anger. It does the same to sorrow.
