#### **CLASS VIII** SUBJECT: ENGLISH SET 1

TIME: 30mins

M.M: 25

Q1. Read the passage given below and answer the questions that follow.

#### Are You Being Bullied

- 1. All of a sudden, Anil became quiet and withdrawn. The once confident child began to stammer and his grades dropped; he was distracted in class. He refused to go to school and was disobedient. One night, his mother heard him cry in bed Nightmares began and the old started to wet the bed.
- 2. She knew something was wrong. She tried to talk to him. When she persisted he burst out, "That Subhash! He calls me names, he punches and kicks me, spreads rumours about me making people laugh at me. I won't go to school. No."
- 3. Bullying is persistent unwelcome behaviour, which intends to hurt physically or emotionally. It has become a very common phenomenon breaks the self-esteem, even leaves life-long emotional scars. Tell when they are being bullied; older ones rarely do.
- 4. Bullying is attention-seeking behaviour. Children see it as a way of being popular, showing off, or making themselves look tough. Some might be jealous of the person they are bullying, or might be victims of bullying themselves. Many do not realize what they are doing is wrong and how it makes their victims feel. They may be witness to bullying behaviour at home or may be acting out their frustrations at home, school, grades, lack of friends, etc. Teachers and parents should see that the bullying child is as much in need of help as their victims.

|              | *********************** | *************************************** |
|              | Section A               |   |

Answer any five from the given seven questions.

(5x2=10)

1. Draw the lines of symmetry in the given figure

2. Solve:

a) 
$$3\frac{1}{5} \div 1\frac{2}{3} =$$

b) 
$$2\frac{3}{5} \times \frac{7}{9} =$$

3. 16% children of a class of 25 like to eat ice-cream in winter. How many children like to eat ice-cream in winter?

4. Solve both sides and then put the sign >, <, = in the box given.

5. Two angles of a triangle are 30° and 80°. Find the third angle.

12. From the figure find i) a pair of angles that form alternate interior angles

ii) a pair of vertically opposite angles

iii) a pair of corresponding angles

13. Simply:-

a) 
$$a + b - 3 + b - a + 3 + a - b + 3 =$$

b) 
$$p - (p - q) - q - (q - p) =$$

14. Solve:

i) 
$$(3^0+2^0) \times 5^0 =$$

ii) Express 108 x 192 as the product of prime factors only in exponential form.
